NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS

2.1.1 Basis of Presentation of Financial Statements

The accompanying financial statements are prepared in accordance with the Communiqué Serial II, No: 14.1, "Principals of Financial Reporting in Capital Markets"("the Communiqué") published in the Official Gazette numbered 28676 on 13 June 2013. According to the article 5 of the Communiqué, financial statements are prepared in accordance with Turkish Accounting Standards ("TAS") issued by Public Oversight Accounting and Auditing Standards Authority ("POAASA"). TAS contains Turkish Accounting Standards, Turkish Financial Reporting Standards ("TFRS") and its addendum and interpretations ("IFRIC").

The financial statements of the Company are prepared as per the CMB announcement of 7 June 2013 relating to financial statements presentations. Comparative figures are reclassified, where necessary, to conform to changes in the presentation of the current year's financial statements.

In accordance with the CMB resolution issued on 17 March 2005, listed companies operating in Turkey are not subject to inflation accounting effective from 1 January 2005. Therefore, the financial statements of the Company have been prepared accordingly.

The Company maintains its books of accounts and prepares its statutory financial statements in accordance with the Turkish Commercial Code ("TCC"), tax legislation and the Uniform Chart of Accounts issued by the Ministry of Finance and principles issued by CMB. Subsidiaries operating in foreign countries have prepared their financial statements in accordance with the laws and regulations of the countries in which they operate. Other than land, buildings and land improvements, machinery and equipments and financial assets and liabilities carried at their fair values, financial statements are prepared and presented based on historical cost convention and in terms of Turkish Lira ("TL") which is the functional currency of the Company.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

2.2 Amendments in Accounting Policies, Comparative Information and Correction of Prior Year Financial Statements

2.2.1 Amendments in Turkish Financial Reporting Standards

a) New standards, amendments and interpretations issued and effective as of 31 December 2015:

- Amendment to TAS 19 regarding defined benefit plans, effective from annual periods beginning on or after 1 July 2014. These narrow scope amendments apply to contributions from employees or third parties to defined benefit plans. The objective of the amendments is to simplify the accounting for contributions that are independent of the number of years of employee service, for example, employee contributions that are calculated according to a fixed percentage of salary.

- Annual Improvements 2012 and 2013: Effective from annual periods beginning on or after 1 July 2014. There are some changes as a result of annual improvements projects 2010-2012 and 2011-2013 cycle.

b) New standards, amendments and interpretations issued and effective as of 31 December 2015 have not been presented since they are not relevant to the operations of the Company or have insignificant impact on the financial statements.

c) New TFRS standards, amendments and TFRICs effective after 31 December 2015:

- Amendment to TAS 16, 'Property, plant and equipment' and TAS 38, 'Intangible assets', on depreciation and amortisation, effective from annual periods beginning on or after
1 January 2016. In this amendment it has clarified that the use of revenue based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the asset. It is also clarified that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset.

- Annual improvements 2014, effective from annual periods beginning on or after
1 January 2016. These set of amendments impacts 4 standards:

    - TFRS 5, 'Non-current assets held for sale and discontinued operations' regarding methods of disposal.
    - TFRS 7, 'Financial instruments: Disclosures', (with consequential amendments toTFRS 1) regarding servicing contracts.
    - TAS 19, 'Employee benefits' regarding discount rates.
    - TAS 34, 'Interim financial reporting' regarding disclosure of information

- TAS 1 "Presentation of Financial Statements"; effective from annual periods beginning on or after 1 January 2016. The purpose of this change is to improve the presentation of financial statements and disclosures.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

- TFRS 15 "Revenue from Contracts with Customers", effective from annual periods beginning on or after 1 January 2017. The new standard, appears as a result of alignment project with Generally Accepted Accounting Principles in United States of America, aims the financial reporting of revenue and the world wide comparability of total revenues in financial statements. The new standard bases on the principal that revenue is accounted for when control of the good or service is transfered to customer, therefore control concept changes the current risk and reward concept.

- TFRS 9 'Financial instruments', effective from annual periods beginning on or after 1 January 2018. This standard replaces the guidance in TAS 39. It includes requirements on the classification and measurement of financial assets and liabilities; it also includes an expected credit losses model that replaces the current incurred loss impairment model.

The Company will determine the effects of these amendments above on the financial statements and will apply after effective date. The above mentioned amendments and interpretations are not expected to have significant impact on the Company's financial statements.

2.2.2 Comparative information and correction of prior year financial statements

The Company's financial statements are prepared comparatively in order to enable the identification of financial position and performance trends. The Company prepared the balance sheet as of 31 December 2015 comparing to the balance sheet as of 31 December 2014, the comprehensive income, equity movement and cash flows for the year ended 31 December 2015 comparing to the comprehensive income, equity movement and cash flows for the year ended 31 December 2014. Comperative financial information are reclassified and significant differences are explained when necessary in order to be in line with the current presentation of financial statements.

2.3. Accounting policies, errors and changes in accounting estimates

Material changes in accounting policies and accounting errors are applied on a retrospective basis as if a prior period error had never occurred or the policy had always been applied. The effect of change in accounting estimate shall be recognized prospectively by including it in the statements of comprehensive income within the period of the change, if the change affects that period only; or period of the change and future periods, if the change affects both.

2.4. Summary of significant accounting policies

The significant accounting policies applied in the preparation of the financial statements are summarized below:

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

2.4.1 Revenue

Revenues are recognized on an accrual basis at the time deliveries are made, services are given and significant risks and rewards are transferred to the buyer, the amount of revenue can be measured reliably and **it is probable that the economic benefits associated with the transaction will flow to the Company** at the fair value of considerations received or receivable. Net sales represent the invoiced value of goods shipped less sales returns, sales discounts and commissions given (Note 32).

The Company bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Revenue is recognised as follows:

Sales of goods:

Sales of goods are recognised when the Company has delivered or sold products to the customer, the customer has accepted the products and collectability of the related receivables is reasonably assured. It is the Company's policy to sell its products to the customers with a right of return. Accumulated experience is used to estimate and provide for such returns at the time of sale.

Sales of services:

Sales of services are accounted for in the period that they are provided by taking into consideration the completion rate.

Interest income:

Interest income is recognised on a time-proportion basis using the effective interest method. When a receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at original effective interest rate of the instrument, and continues unwinding the discount as interest income.

Dividend income:

Dividend income is recognised when the Company's right to receive payment is established.

2.4.2 Inventory

Company's raw materials mainly consist of materials and packaging materials which are used to produce bottled water, finished goods mainly consist of bottled water.

Inventories are valued at the lower of cost or net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the costs of completion and selling expenses. Cost elements included in inventories comprise all costs of purchase of material and other costs incurred in bringing the inventories to their present location and condition such as labor and appropriate amount of factory overheads (based on normal operating capacities). The cost of inventories is determined on the monhtly weighted average basis (Note 11).

(Amounts expressed in Turkish Lira ("TL") unless otherwise indicated.)

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

2.4.3 Property, plant and equipment

Property, plant and equipment, except for land and land improvements, buildings, machinery and equipment, acquired before 1 January 2005 are carried at cost, in the equivalent purchasing power of TL as at 31 December 2004 and items acquired after 1 January 2005 are carried at cost, less the subsequent depreciation and impairment loss, if any, as of 31 December 2015. The Company's land and land improvements, buildings and machinery and equipments are stated at fair value, based on valuations by external independent valuer at 31 December 2015, namely TSKB Gayrimenkul Değerleme A.Ş. (Note 2.5.i and 15). As of the date of the revaluation, the accumulated depreciation of the property, plant and equipment subject to revaluation is netted by the cost of the property, plant and equipment and in the following periods revalued net book value is taken into consideration.

Increases in the carrying amount arising on the revaluation of land, land improvements, buildings and machinery and equipment are credited to the revaluation reserve in equity, net of applicable deferred income tax. For certain assets, the increase was recognized in the consolidated statement of comprehensive income to the extent that it reversed the impairment of the same asset previously recognized in the consolidated statement of comprehensive income. Decreases that offset previous increases of the same asset are charged against that reserve; all other decreases are charged to the statement of comprehensive income. Each year the difference between depreciation based on the revalued carrying amount of the asset (the depreciation charged to the statement of comprehensive income) and depreciation based on the asset's original cost is transferred from the revaluation reserve to the accumulated losses.

Buildings, machinery and equipment are capitalised and depreciated when they are in the location and condition necessary for it to be capable of operating in the manner intended by the management. At each balance sheet date, residual values and estimated useful lives of property, plant and equipment are reviewed and adjusted if appropriate, prospectively.

Advances given for property, plant and equipment purchases are classified in prepaid expenses under non-current assets until related assets is capitalized. In each reporting period, salvage values of property, plant and equipments and approximate useful lives are reassessed and necessary adjustments are performed prospectively.

Depreciation is provided on the cost or revalued amounts of property, plant and equipment on a straight-line basis less any impairment (Note 15). Land is not depreciated as it is deemed to have an indefinite life. The estimated useful lives of property, plant and equipments are as follows:

Buildings and land improvements	25 - 45 years
Machinery and equipments	5 - 25 years
Motor vehicles (including leased machinery and equipment)	5 years
Furniture and fixtures	5 - 10 years

As of the balance sheet date, the useful lives of assets are reassessed and adjusted when necessary. Subsequent costs are included in the asset's carrying value recognised as separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Property, plant and equipment are reviewed for impairment losses, whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. For the purpose of assessing impairment, property plant and equipment assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

An impairment loss is recognized for the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of fair value less cost to sell or value in use. If the asset subject to impairment was revalued, the impairment loss is first deducted from revaluation fund and the remaining part is accounted for in comprehensive income statement.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

Repairs and maintenance are charged to the statements of comprehensive income during the financial period in which they are incurred. The Company derecognizes the carrying amounts of the replaced parts related to renovations regardless of whether the replaced parts were depreciated separately. Major overhauls are depreciated over shorter of their useful lives or the remaining useful life of the related assets. Gains or losses on disposals of property, plant and equipment are determined by reference to their carrying amounts and are included in the related income and expense accounts, as appropriate. On the disposal of revalued assets, amounts in the revaluation reserve relating to that asset are transferred to the retained earnings.

2.4.4 Intangible assets

Intangible assets have finite useful lives and mainly comprise of information technology systems, programs and some other rights. These assets acquired before 1 January 2005 are carried at cost, in the equivalent purchasing power of TL as at 31 December 2004 and items acquired after 1 January 2005 are carried at cost, less the subsequent depreciation and impairment loss, if any, as of 31 December 2015. Costs associated with maintaining computer software programs are recognized as an expense when incurred. The intangible assets recorded at acquisition cost are amortized on a straight-line basis over their estimated useful lives for a period of five years from the date of acquisition. Gain or losses on disposals or on impairments of intangible assets with respect to their amounts are included in the related income and expense accounts. Residual values of intangible assets are deemed as negligible. Intangible assets are reviewed for impairment losses whenever events or changes in circumstances indicate that the carrying amount may not be recoverable (Note 18). For the purpose of assessing impairment, intangible assets are grouped at the lowest levels for which there are separately identifiable cash flows. An impairment loss is recognized for the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of fair value less cost sell or value in use.

2.4.5 Impairment of assets

Impairment of financial assets

- Assets carried at amortized cost

The Company assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The criteria that the Company uses to determine that there is objective evidence of an impairment loss include:

- Significant financial difficulty of the issuer or obligor,
- A breach of contract, such as a default or delinquency in interest or principal payments,
- The Company, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider,
- It becomes probable that the borrower will enter bankruptcy or other financial reorganisation,

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

- Observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the portfolio, including:

    (i) Adverse changes in the payment status of borrowers in the portfolio; and
    (ii) National or local economic conditions that correlate with defaults on the assets in the portfolio.

The Company first assesses whether objective evidence of impairment exists.

For loans and receivables category, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognized in the consolidated statement of comprehensive income.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the reversal of the previously recognized impairment loss is recognized in the consolidated statement of comprehensive income.

- Assets classified as available for sale

The Company assesses at the end of each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity investments classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is also evidence that the assets are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in profit or loss - is removed from equity and recognized in the consolidated statement of comprehensive income.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, impairment losses recognized in the consolidated comprehensive income statement, on equity instruments are not reversed through the consolidated statement of comprehensive income.

Impairment of non-financial assets:

At each reporting date, the company assesses whether there is an impairment indication for the assets, except for the deferred income tax asset. When an indication of impairment exists, the company estimates the recoverable amounts of such assets. The recoverable amounts of intangible assets not yet available for use to be masured annually. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

2.4.6 Borrowing and borrowing cost

Borrowings are recognized initially at the proceeds received, net of any transaction costs incurred. In subsequent periods, borrowings are restated at amortized cost using the effective yield method. Any difference between proceeds (net of transaction costs) and the redemption value is recognized in the statement of comprehensive income over the period of the borrowings. Borrowing costs are expensed as incurred (Note 37). If the borrowings mature within 12 months, then they are classified in current liabilities, otherwise they are classified in non-current liabilities (Note 25). Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a pre-payment for liquidity services and amortized over the period of the facility to which it relates.

2.4.7 Financial assets

At each reporting date, the Company assesses whether there is an impairment indication for the assets, except for the deferred income tax asset. When an indication of impairment exists, the Company estimates the recoverable amounts of such assets. The recoverable amounts of intangible assets not yet available for use to be masured annually. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

i. Classification

- Loans and receivables

  Loans and receivables constitute non-derivative financial instruments, which are not quoted in active markets and have fixed or scheduled payments. If the maturity of these instruments are less than 12 months, these loans and receivables are classified in current assets and if more than 12 months, classified in non-current assets. The loans and receivables are included in Trade receivables and Other receivables in the balance sheet.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

- Available-for-sale investments

  The financial instruments that can not be subject to a different classification and that can be sold in order to meet the liquidity need or as a result of changes in interest rates and hold without any time constraint are classified as available-for-sale investments. They are included in non-current assets unless the investment matures or management intends to dispose of it within 12 months of the end of the reporting period. The Company management is performing appropriate classification of these financial instruments as of the purchase date and is reassessing on a regular basis.

ii. Recognition and measurement

Regular purchases and sales of financial assets are recognized on the trade-date -the date on which the Company commits to purchase or sell the asset. Investments are initially recognized at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. If the Company's financial assets that the Company has shares less than 20%, does not possess control or significant influence and classified as available for sale assets, are traded in stock exchange are accounted for by taking into account the market values. If there is not any active market, the Company is calculating the fair value of the financial asset by using generally accepted valuation standards. When the fair value of the financial assets can not be reliably measured due to the fact that there is not any market value, other methods used in order to calculate fair value are not appropriate and performable, the carrying amount of the financial asset acquired before 1 January 2005 are carried at cost, in the equivalent purchasing power of TL as at 31 December 2004 and items acquired after 1 January 2005 are carried at cost, less the subsequent depreciation and impairment loss, if any, as of 31 December 2015.

Financial assets are derecognized when the rights to receive cash flows from the investments have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value.

Loans and receivables are subsequently carried at amortized cost using the effective interest method.

Dividend income is recognized in the statement of income as part of investment income when the Company's right to receive payments is established.

Changes in the fair value of monetary and non-monetary securities classified as available for sale are recognized in other comprehensive income. When securities classified as available for sale are sold or impaired, the accumulated fair value adjustments recognized in equity are included in the income statement as 'gains and losses from investment securities'. Interest on available-for-sale securities calculated using the effective interest method is recognized in the income statement as part of other income.

The Company does not have financial assets at fair value through profit or loss and held to maturity financial assets.

2.4.8. Foreign currency translations and balances

Transactions in foreign currencies during the year have been translated at the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies have been translated into TL at the exchange rates prevailing at the balance sheet dates. The exchange differences that were recorded are recognised in the statements of income and other comprehensive income as part of the profit for the year.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

2.4.9 Earnings/ (loss) per share

Earnings/ (loss) per share disclosed in the statement of income and other comprehensive income are determined by dividing net profit/ (loss) for the year by the weighted average number of shares that have been outstanding during the year concerned (Note 42). Companies can increase their share capital by making a pro-rata distribution of shares ("bonus shares") to existing shareholders from retained earnings. For the purpose of earnings/ (loss) per share computations, the weighted average number of shares outstanding during the year has been adjusted in respect of bonus shares issues without a corresponding change in resources, by giving them retroactive effect for the year in which they were issued and for each earlier year. In case of dividend distribution, earnings per share is calculated by dividing net income by the number of shares, rather than dividing by weighted average number of shares outstanding.

2.4.10 Subsequent events

Subsequent events, announcements related to net profit or even declared after other selective financial information has been publicly announced, include all events that take place between the balance sheet date and the date when balance sheet was authorized for issue.

In the case that events require a correction to be made occur subsequent to the balance sheet date, the Company makes the necessary corrections to the financial statements. Moreover, the events that occur subsequent to the balance sheet date and that do not require a correction to be made are disclosed in accompanying notes, where the decisions of the users of financial statements are affected.

2.4.11 Provisions, contingent assets and contingent liabilities

Possible assets or obligations that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company are treated as contingent assets or liabilities. The Company does not recognise contingent assets and liabilities. A contingent liability is disclosed, unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed, where an inflow of economic benefits is probable (Note 26).

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small. Provisions are not recognised for future operating losses.

i) Employee Benefits/Termination Benefit

Provision for employment termination benefits represents the present value of the estimated total provision of the future probable obligation of the Company arising from the retirement of the employees calculated in accordance with the Turkish Labour Law. In accordance with existing social legislation and Turkish Labor Law in Turkey, the Company is required to make lump-sum termination indemnities to each employee whose employment is terminated due to retirement or for reasons other than resignation or misconduct and who has completed at least one year of service. Provision is made for the present value of the defined benefit obligation calculated using the projected unit credit method (Note 28). All actuarial gains and losses are recognised in other comprehensive income in the statements of comprehensive income.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

ii. Bonus Provision

The Company recognizes a liability and an expense for bonus and profit-sharing for the management and board of directors, based on a formula that takes into consideration the profit attributable to the shareholders after certain adjustments. The Company recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

2.4.12 Related parties

For the purpose of these financial statements, shareholders having control, joint control or significant influence over the Company, Yaşar Group companies, key management personnel and board members of the Company or parent Company "Yaşar Holding" and their close family members, together companies controlled, jointly controlled or significantly influenced by them are considered as and referred to as related parties (Note 7).

2.4.13 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who takes strategic decisions on allocating resources and assessing performance of the operating segments, has been identified as the key management.

The chief operating decision makers regularly monitor and review the operational results based on the main products' performances in domestic and foreign markets. However, as the nature of the products, production processes, type of customers, distribution methods and regulatory environment for the operations of the Company are identical, and the operations performed in foreign markets is not significant, there is a single reportable segment, and segment reporting is not applicable.

2.4.14 Current and deferred income taxes

The tax expense for the period comprises current and deferred income tax. The current income tax liability includes the taxes payable calculated on the taxable portion of the period income with tax rates enacted on the balance sheet date (Note 41).

Deferred income tax income or expense is recognized in the statement of income and other comprehensive income, except to the extent that it relates to items recognized directly in equity. In case, when the tax is related to items recognized directly in equity and other comprehensive income, the tax is also recognized in equity and other comprehensive income.

Deferred income tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying values in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects either accounting nor taxable profit or loss. Deferred income tax is determined using tax rates and laws that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets or liabilities are reflected to the financial statements to the extent that they will provide an increase or decrease in the taxes payable for the future periods where the temporary differences will be reversed. Deferred income tax liabilities are recognized for all taxable temporary differences, where deferred income tax assets resulting from deductible temporary differences are recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary difference can be utilized. To the extent that deferred income tax assets will not be utilized, the related amounts have been deducted accordingly.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

2.4.15 Statement of cash flow

In the statement of cash flows, cash flows are classified into three categories as operating, investing and financing activities. Cash flows from operating activities are those resulting from the Company's production and sales activities. Cash flows from investing activities indicate cash inflows and outflows resulting from property, plant and equipment and financial investments. Cash flows from financing activities indicate the resources used in financing activities and the repayment of these resources. For the purposes of the statement of cash flows, cash and cash equivalents comprise of cash in hand accounts, bank deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash with maturities equal or less than three months.

2.4.16 Share capital and dividends

Ordinary shares are classified as equity. Dividends payable on shares are recognized as an appropriation of the profit in the period in which they are declared. Dividend income is recognized when the Company's right to receive the payment is established.

2.5 Critical accounting estimates and judgments

Preparation of financial statements requires the use of estimates and assumptions that may affect the amount of assets and liabilities recognized as of the balance sheet date, disclosures of contingent assets and liabilities and the amount of revenue and expenses reported. Although these estimates and assumptions rely on the Company management's best knowledge about current events and transactions, actual outcomes may differ from those estimates and assumptions. Significant estimates of the Company management are as follows:

i) Revaluation of land, buildings and land improvements, machinery and equipments

Revaluations are performed with the sufficient regularity to ensure that the carrying amounts of the revalued property, plant and equipment and investment properties do not differ materially from that which would be determined using fair value at the end of the reporting periods. The frequency of the revaluation depends upon the changes in the fair values of the items of property, plant and equipment and investment properties. When the fair value of a revalued asset differs materially from its carrying amount, a further revaluation is required and revaluation is performed for entire class of revalued item simultaneously. Besides, for items of property, plant and equipment and investment properties with only insignificant changes in fair value frequent revaluations and fair value measurements are considered unnecessary.

As there were no recent similar buying/selling transactions nearby, revaluations of land were based on the method of reference comparison whereas revaluations of buildings and land improvements and machinery and equipment were based on the method of cost approach and based on the following valuation techniques and assumptions;

- Revaluations of land were based on the method of reference comparison whereas revaluations of buildings and land improvements and machinery and equipment were based on the method of cost approach, considering existing utilization of the aforementioned property, plant and equipments are consistent to the highest and best use approach.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

- In the market reference comparison method, current market information was utilized, taking into consideration the comparable property in the market in recent past in the region, price adjustment was made within the framework of criteria that could affect market conditions, and accordingly an average m² sale value was determined for lands subject to the valuation. The similar pieces of land found were compared in terms of location, accessibility, size, settlement status, changes in settlement status, physical conditions, real estate marketing firms were consulted for up-to-date valuation of the estate market, also, current information and experience of the professional valuation company was utilized.

- In the cost approach method, fair value of the buildings and land improvements was calculated by considering recent re-construction costs and related depreciation. In the cost approach method, above explained market reference comparison method was used in calculation of the land value, one of the components.

- Since a fully integrated industrial plant was in discussion, the revaluation work was performed based on all the active and functioning assets in the integrated plant rather than taking as basis the data for the second-hand market within the scope of the valuation of the machinery and equipment. Such machinery and equipment were reviewed and assessed by their line.

that would result from the outcome of a sales transaction between independent parties.

As of initial recognition and as of balance sheet date, the Company performs impairment assessment for buildings, land improvements and machinery and equipment of which valuations are based on cost approach, accordance with the "TAS 36 Impairment of Assets", and no impairment indicator is identified.

ii) Fair value determination of available-for-sale investments

The generally accepted valuation techniques used in fair value determination of available-for-sale investments for which there is no quoted market price exists, consist of several assumptions, which are based on the management's best estimates and fair value available-for-sale investments could be different when the purchase/ sales of the transactions incurred (Note 48).

iii) Income taxes

There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business and significant judgment is required in determining the provision for income taxes. The Company recognizes tax liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. In this respect, the Company did not recognise deferred income tax assets arising from tax losses carried forward and other deductible differences as their future utilisation is not virtually certain (Note 41). Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred income tax provisions in the period in which such determination is made.

NOTE 2 - BASIS OF PREPARATION OF FINANCIAL STATEMENTS (Continued)

2.6. Offsetting

All items with significant amounts and nature, even with similar characteristics, are presented separately in the financial statements. Insignificant amounts are grouped and presented by means of items having similar substance and function. When the nature of transactions and events necessitate offsetting, presentation of these transactions and events over their net amounts or recognition of the assets after deducting the related impairment are not considered as a violation of the rule of non-offsetting. As a result of the transactions in the normal course of business, revenue other than sales are presented as net if the nature of the transaction or the event qualify for offsetting.

2.7 Compliance declaration to resolutions published by POAASA and TAS/ TFRS

The Company's management is responsible for the preparation and fair presentation of these financial statements in accordance with the Turkish Accounting Standards published by the Public Oversight Accounting and Auditing Standards Authority. As Company management, we declare that the current and previous period financial statements together with the summary of the important accounting policies and notes to the financial statements are prepared and presented in accordance with Turkish Accounting Standards published by the Public Oversight Accounting and Auditing Standards Authority.

NOTE 8 - TRADE RECEIVABLES AND PAYABLES (Continued)

Concentrations of credit risk with respect to trade receivables are limited due to the Company's widely dispersed customer base, covering the spectrum of manufacturing and distribution and the variety of available end markets in which they sell. The Company's past experience in collection of accounts receivable falls within the recorded allowances. Due to this fact, management believes that no additional credit risk beyond amounts provided for collection losses is inherent in the Company's trade receivables.

The aging of overdue receivables as of 31 December 2015 and 2014 are as follow:

	31 December 2015	**31 December 2014**
0 - 90 days	2.130.765	2.598.122

Aydın Bozdoğan Municipality charged a total of TL2.093.242 to the Company as the spring water fee in return for services rendered in line with Article 63 of the Law on Municipal Revenues within 2015 (31 December 2014: TL2.841.595). Regarding the mentioned spring water fee, the Company filed a lawsuit against Aydın Bozdoğan Municipality based on the claim that all procedures related to production permit, licensing, packaging, labelling, sales and audit of natural mineral waters are carried out by the Turkish Ministry of Health and its relevant bodies in line with the provisions of the "Regulation on Natural Mineral Waters" No. 25657, dated 1 December 2004. As of 31 December 2015, the local court rejected the lawsuit, which was subsequently taken to a higher court for appeal. Inline with the prudency principle of accounting, Company management recognised the mentioned spring water fee provision in the cost of sales. Movements of the provision the spring water fee porvision during the years 2015 and 2014 are as follow:

(Amounts expressed in Turkish Lira ("TL") unless otherwise indicated.)

NOTE 28 - EMPLOYEE BENEFITS (Continued)

Under Turkish Labour Law, the companies incorporated in Turkey are required to pay termination benefits to each employee who has completed one year of service and whose employment is terminated without due cause, is called up for military service, dies or who retires after completing 25 years of service (20 years for women) and achieves the retirement age (58 for women and 60 for men).

The amount payable consists of one month's salary limited to a maximum of TL3.828,37 for each year of service as of 31 December 2015 (31 December 2014: TL3.438,22).

The liability is not funded, as there is no funding requirement. The provision has been calculated by estimating the present value of the future probable obligation of the Company arising from the retirement of the employees with certain actuarial assumptions.

The principal assumption is that the maximum liability for each year of service will increase in line with inflation. Thus, the discount rate applied represents the expected real rate after adjusting for the anticipated effects of future inflation. The maximum amount of TL4.092,53 which is effective from
1 January 2016 (1 January 2015: 3.541,37 TL) has been taken into consideration in calculating the provision for employment termination benefits of the Company which is calculated once in every six months.

The following actuarial assumptions were used in the calculation of the total liability:

	31 December 2015	31 December 2014
Discount rate (p.a) (%)	3,95	3,95
Probability of retirement (%)	96,74	97,09

Movements of the provision for employment termination benefits during the years are as follows:

	2015	2014
1 January	**1.749.436**	**1.900.678**
Interest costs	175.844	160.071

Paid during the year	(740.684)	(842.092)
31 December	**1.921.790**	**1.749.436**

The total of interest cost and current service cost amounting to TL449.992 (31 December 2014: TL422.420) were totally allocated to general administrative expenses (31 December 2014: TL309.502) (Note 34) and there is not any allocations to cost of sales (31 December 2014: TL112.918).

(Amounts expressed in Turkish Lira ("TL") unless otherwise indicated.)

In Turkey, companies may exceed registered share capital nonrecurringly-except for cash injection-through capital increase from internal sources. Registered share capital may not be exceeded through capital increase by cash injection.

Inflation adjustment to share capital amounting to TL11.713.515 (31 December 2014: TL11.713.515) represents the remaining amount after netting-off the accumulated losses of the year 2003 from the difference between restated share capital and historical cost of share capital.

The Company has 1.278.934.500 (31 December 2014: 1.278.934.500) units of shares with a face value of Kr1 each as of 31 December 2015.

The Company’s authorised registered share capital is composed of registered shares and its shares have been quoted at the BIST. There are no privileges given to specific shareholders. Retained earnings, as per the statutory financial statements, are available for distribution, subject to the legal reserve requirement referred to below:

The legal reserves consists of first and second legal reserves appropriated in accordance with the Turkish Commercial Code. The first legal reserve is appropriated out of the statutory profits at the rate of 5%, until the total reserves reaches a maximum of 20% of the company’s share capital. The second legal reserve is appropriated at the rate of 10% off all distributions in excess of 5% of the company’s share capital. Under TTC , the legal reserves can only be used to offset losses and are not available for any other usage unless they exceed 50% of paid in share capital.

NOTE 31 - SHARE CAPITAL, RESERVES AND OTHER EQUITY ITEMS (Continued)

The aforementioned reserves were accounted for under "Restricted Reserves" in accordance with CMB Financial Reporting Standards. The restricted reserves of the Company amount to TL4.180.008 (31 December 2014: TL4.180.008) as of 31 December 2015. The unrestricted extraordinary reserves the Company amount to TL11.673.135 (31 December 2014: TL11.673.135), and classified in the retained earnings.

In accordance with related announcements of CMB "Share capital", "Restricted Reserves" and "Share Premium" shall be carried at their statutory amounts. The valuation differences (e.g. the differences raising from inflation adjustments) shall be classified as follows:

- the difference arising from the "Paid-in Capital" shall be classified as the "Inflation Adjustment to Share Capital" if it is not transferred to capital yet;

- the difference due to the "Restricted Reserves" and "Share Premium" shall be classified as "Retained earnings" if the amount has not been utilised in dividend distribution or capital increase yet. Other equity items shall be carried at the amounts calculated based on CMB Financial Reporting Standards.

Adjustment to share capital has no other use other than being transferred to share capital.

Quoted companies are subject to dividend requirements regulated by the CMB according to II-19.1 no. has enacted since 1 February 2014.

Companies distribute dividends in accordance with their dividend payment policies settled and dividend payment decision taken in general assembly and in conformity with relevant legislations. The communique does not state a minimum dividend rate. Companies distribute dividends in accordance with the method defined in their dividend policy or articles of association. Additional, dividend can be distributed in fixed or variable installments and dividends advances can be paid over the profit on interim financial statements.

In line with Article 27 of the Company's Articles of Association, previous year losses, if any, are deducted from the net period profit and then overall legal reserve and the first dividend are allocated according to the Capital Markets Board legislation. Of the remaining amount, 10% of the portion is allocated in order to be distributed to founder shareholders in proportion with their shares. Of the remaining portion, an amount up to 5% can be set aside as allocation provision for the members of board of directors and for other items which the board of directors will determine and deem necessary in line with the decision made by the General Assembly.

Unless the general reserves that has to be appropriated in accordance with TCC or the dividend to shareholders as determined in the articles of association or dividend policy are set aside ; no decision can be taken to set aside other reserves, to transfer reserves to be subsequent year or to distribute dividends to holders of usufruct right certificates, to board of directors members or to employees ; and no dividend can be distributed to those unless the determined dividend to shareholders is paid in cash.

Dividend in public companies, of the date of distribution to all existing shares, regardless of the date of issuance and acquisition of these shares will be distributed equally.

NOTE 40 - NON-CURRENT ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS

None (31 December 2014: None).

NOTE 41 - INCOME TAXES (INCLUDING DEFERRED TAX ASSETS AND TAX LIABILITIES)

In Turkey, the corporation tax rate of the fiscal year 2015 is 20% (31 December 2014: 20%). Corporation tax is payable at a rate of 20% on the total income of the Company after adjusting for certain disallowable expenses, exempt income (exemption for participation in subsidiaries, exemption for investment incentive allowance etc.) and allowances (such as research and development expenditure allowances). No further tax is payable unless the profit is distributed (except for withholding tax at the rate of 19,8% (31 December 2014: 19,8%), calculated on an exemption amount if an investment allowance is granted in the scope of Income Tax Law temporary article 61).

Dividends paid to non-resident corporations, which have a place of business in Turkey, or resident corporations are not subject to withholding tax. Otherwise, dividends paid are subject to withholding tax at the rate of 15% (31 December 2014: 15%). An increase in capital via issuing bonus shares is not considered profit distribution and thus does not incur withholding tax.

Corporations are required to pay advance corporation tax quarterly at the rate of 20% (31 December 2014: 20%) on their corporate income. Advance tax is declared by 14th and payable by the 17th of the second month following each calendar quarter end. Advance tax paid by corporations is credited against the annual corporation tax liability. If, despite offsetting, there remains an amount for advance tax amount paid, it may be refunded or offset against other liabilities to the government.

In Turkey, there is no procedure for a final and definitive agreement on tax assessments. Companies file their tax returns within the 25th of the fourth month following the close of the financial year to which they relate.

Tax returns are open for five years from the beginning of the year that follows the date of filing during which time the tax authorities have the right to audit tax returns, and the related accounting records on which they are based, and may issue re-assessments based on their findings. Under the Turkish taxation system, tax losses can be carried forward to offset against future taxable income for up to five years. Tax losses cannot be carried back to offset profits from previous periods.

There are many exemptions in Corporate Tax Law regarding corporations. Those related to the Company are explained below:

Dividend gains from shares in capital of another corporation subject to resident taxpaying (except dividends from investment funds participation certificates and investment trusts shares) are exempt from corporate tax.

NOTE 41 - INCOME TAXES (INCLUDING DEFERRED TAX ASSETS AND TAX LIABILITIES) (Continued)

According to Turkish Corporate Income Tax Law numbered 5520, effective from 21 June 2006, 75% portion of the gains derived from the sale of preferential rights, usufruct shares and founding shares from investment equity and real property, which has remained in assets for more than two full years are exempt from corporate tax. To be entitled to the exemption, the relevant gain is required to be held in a fund account in the liabilities and it must not be withdrawn from the entity for a period of five years. The sales consideration has to be collected up until the end of the second calendar year following the year the sale was realised.

75% of the profits from sale of preferential right certificates and share premiums generated from sale of shares at a price exceeding face values of those shares during incorporations or capital increases of joint stock companies are exempt from corporate tax.

Accordingly, the aforementioned gains/ (losses) which have been included in trade profit/ (loss) have been taken into consideration in calculation of Company's corporate tax.

Apart from the exemptions mentioned in the preceding paragraphs, the deductions granted in 14th and recurring 8th articles of Corporate Tax Law and 40 th article of the Income Tax Law together with the 10th article of Corporate Tax Law have been taken into consideration in calculation of the Company's corporate tax.

Transfer Pricing

Corporations should set the prices in accordance with the arm's length principle while entering into transactions regarding the sale or purchase of goods and services with related parties. Under the arm's length principle within the new legislation related parties must set the transfer prices for purchase and sale of goods and services as if they would have been agreed between third parties. Depending on the circumstances, a choice of accepted methods in aforementioned law of arm's length transaction has to be made by corporations for transactions with related parties. Corporations should keep the documentary evidence within the company representing how arm's length price has been determined and the methodology that has been chosen by use of any fiscal records and calculations in case of any request by tax authorities. Besides, corporations must report transactions with related parties in a fiscal period.

If a taxpayer enters into transactions regarding the sale or purchase of goods and services with related parties, where the prices are not set in accordance with the arm's length principle, then related profits are considered to be distributed in a disguised manner through transfer pricing. The profit distributed in a disguised manner through transfer pricing completely or partially, will be assessed as distributed profit share or transferred amount to headquarter for limited taxpayers. After the distributed profit share is considered as net profit share and complemented to gross amount, deemed profit will be subject to corporate tax. Previous taxation processes will be revised accordingly by taxpayer who distributes disguised profit. In order to make adjustments in this respect, the taxes assessed in the name of the company distributing dividends in a disguised manner must be finalised and paid.

NOTE 42 - EARNINGS/ (LOSS) PER SHARE

Basic earnings/ (loss) per share is calculated by dividing the profit/ (loss) attributable to equity holders of the parent company by the weighted average number of ordinary shares in issue during the year excluding ordinary shares purchased and held as treasury shares.

Companies can increase their share capital by making a pro-rata distribution of shares ("bonus shares") to existing shareholders from retained earnings. For the purpose of earning/ (loss) per share computations, the weighted average number of shares outstanding during the year has been adjusted in respect of bonus shares issues without a corresponding change in resources, by giving them retroactive effect for the year in which they were issued and for each earlier year.

		1 January - 31 December 2015	**1 January - 31 December 2014**

NOTE 49 - NATURE AND LEVEL OF RISKS DERIVING FROM FINANCIAL INSTRUMENTS

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, cash flow, fair value interest rate risk), capital risk, credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance of the Company.

Risk management is carried out by the senior management and finance department of the Company under policies approved by Board of Directors. The Board of Directors provides principles for overall risk management as well as policies covering specific areas, such as foreign exchange risk, interest rate risk and capital risk and closely monitors financial and operational risks.

The financial risk management objectives of the Company are defined as follows;

- Safeguarding the Company›s core earnings stream from its major assets through the effective control and management of foreign exchange risk and interest rate risk,

- Effective and efficient usage of credit facilities in both the short and long term through the adoption of reliable liquidity management planning and procedures

- Effective monitoring and minimizing risks sourced from counterparts.

a) Credit risk:

Ownership of financial assets involves the risk that counterparties may be unable to meet the terms of their agreements and in turn credit risk arises from cash and cash equivalents, deposits in banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transactions. Risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. These risks are monitored by credit ratings and limiting the aggregate risk to any individual counter party and receiving guarantees when required. The Company's exports are realised by its related party, YDT and the related export receivables are monitored by YDT. The following tables analyse the Company's credit risk as of 31 December 2015 and 2014:

b) Liquidity risk:

Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions.

The ability to fund the existing and prospective debt requirements is managed by maintaining the availability of fund providers' lines from high quality lenders. In order to maintain liquidity, the Company management closely monitors the collection of trade receivables on time in order to and to prevent any financial burden that may result from late collections and arranges cash and non-cash credit lines with banks for the use of the Company.

NOTE 49 - NATURE AND LEVEL OF RISKS DERIVING FROM FINANCIAL INSTRUMENTS (Continued)

ii) Interest Risk

The Company is exposed to interest rate risk through the impact of rate changes on interest bearing assets and liabilities.

	Interest Rate Position Schedule	
	31 December 2015	**31 December 2014**
Financial instruments with fixed interest rate		
Financial assets	26.757.459	32.580.719
Financial liabilities	80.711.675	47.969.502
Financial instruments with floating interest rate		
Financial liabilities	9.449.728	10.510.649

iii) Price risk

The operational profitability of the Company and the cash flows generated by these operations are affected by the changes in the raw material prices and market competition. These prices are closely followed up by the Company management to reduce the pressure of the costs on selling prices and necessary precautions for cost reductions are taken accordingly. Price risk is monitored by Board of Directors and Audit Committee via regular meetings.

d) Capital risk management:

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Company monitors capital on the basis of the gearing ratio and changes in the earnings before interest depreciation and amortization ("EBITDA"). Gearing ratio is calculated as net debt divided by total equity. Net debt is calculated as total borrowings due to related parties - non trade less cash and cash equivalents. EBITDA is calculated as operational profit/ (loss) less depreciation, amortization, employment termination benefits and other nonrecurring expenses.

(Amounts expressed in Turkish Lira ("TL") unless otherwise indicated.)

NOTE 50 - FINANCIAL INSTRUMENTS (FAIR VALUE AND FINANCIAL RISK MANAGEMENT DISCLOSURES)

Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation, and is best evidenced by a quoted market price, if one exists.

The estimated fair values of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, judgment is necessarily required to interpret market data to estimate the fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realise in a current market exchange.

The following methods and assumptions were used to estimate the fair value of the financial instruments:

Financial Assets

The fair values of balances denominated in foreign currencies, which are translated at year-end exchange rates, are considered to approximate to their carrying values. Cash and cash equivalents are carried at their fair values. The fair values of trade receivables and due from related parties, are considered to approximate their respective carrying values due to their short-term nature.The cost of financial assets available for sale investments less, if any, impairments are considered to approximate their fair values.

Financial Liabilities

Fair values of bank borrowings are disclosed in Note 25.

Trade payables, payables to related parties and other monetary liabilities are estimated to be presented with their discounted carrying amounts and they are considered to approximate to their fair values and the fair values of balances denominated in foreign currencies, which are translated at year-end exchange rates, are considered to approximate carrying values.

(Amounts expressed in Turkish Lira ("TL") unless otherwise indicated.)

NOTE 50 - FINANCIAL INSTRUMENTS (FAIR VALUE AND FINANCIAL RISK MANAGEMENT DISCLOSURES) (Continued)

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The following table presents the Company's assets and liabilities that are measured at fair value at 31 December 2015 and 2014:

31 December 2015	**Level 1**	**Level 2**	**Level 3 (*)**	**Total**
